# NITESH YADAV

**Full Stack Developer** | **1.5 Years Experience**

**Phone:** +91 9651451856 **Email:** niteshtechsunset@gmail.com **Portfolio:** View Portfolio

## WORK EXPERIENCE

**TechSunset** **Apr 2025 – Oct 2026**

*Full Stack Developer — Remote*

- Developed and maintained production-grade enterprise web applications using **React, Next.js, Node.js, Express.js, and MongoDB**.
- Designed responsive, accessible UI dashboards, management workflows, filtering tables, and API-driven reactive screens.
- Built and deployed secure **RESTful APIs** supporting CRUD operations, JWT authentication, role-based controls, and validation.
- Optimized database performance using **MongoDB Aggregations** and **PostgreSQL** structured schema designs.
- Managed modern application deployment workflows leveraging **AWS, Docker, CI/CD, Redis, Kafka, and RabbitMQ**.

## PRODUCT DEVELOPMENT EXPERIENCE

**1. CRM – Customer Relationship Management**
crm.techsunset.com

- Engineered end-to-end customer management profiles, lead status tracking, interactive dashboards, and advanced contact search tools.
- Built robust lead CRUD APIs, authorization middleware, status automation, and optimized database queries in MongoDB.

**2. TechSunset Books – Accounting & Invoicing**
books.techsunset.com

- Developed double-entry accounting dashboards, GST tax summary reports, payment tracking, and automated PDF invoice engines.
- Built financial transactional APIs for customer/vendor ledgers, expense logs, and real-time revenue report generation.

**3. TechSunset HRMS – Human Resource Management**
hr.techsunset.com

- Built employee management portals covering automated attendance logging, leave approval workflows, and department structures.
- Formulated authentication middleware, payroll calculations, and scalable HR analytics reporting services.

**4. TechSunset Inventory – Inventory Management**
inventory.techsunset.com

- Developed real-time stock monitoring, supplier order handling, multi-warehouse operations, and order fulfillment systems.
- Implemented stock alert triggers, supplier purchase order APIs, and optimized query operations for fast data updates.

**5. TechSunset Project – Project & Task Management**
project.techsunset.com

- Built dynamic Kanban drag-and-drop boards, sprint task tracking, team workload indicators, and calendar timeline trackers.
- Developed APIs for subtask management, user assignments, project milestones, and automated progress engine calculations.

**6. TS Campus – AI-Driven School Management**
tscampus.com

- Developed AI-powered admission pipelines, student fee structure management, attendance tracking, and exam marksheets.
- Engineered scalable backend services connecting student records with automated notification triggers and admin controls.

## ABOUT ME

Full Stack Developer with 1.5+ years of practical software engineering experience building and maintaining high-performance production applications. Joined TechSunset as a Remote Developer in April 2025, taking ownership of scalable frontend interfaces, backend microservices, REST APIs, and database architectures across enterprise web applications.
“‘latex

## TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, Mongoose, PostgreSQL, Prisma ORM
- **Cloud & DevOps:** AWS (EC2, S3), Docker, CI/CD Pipelines
- **Tools & Systems:** Git, GitHub, Postman, Redis, Kafka, RabbitMQ

## EDUCATION

**Bachelor of Technology (B.Tech)** **2022 – 2026**

**KNIT Sultanpur**

## QUALITIES

- Effective Technical Communication
- Time Management & Prioritization
- Team Organization & Ownership
- Scalable Problem Solving Skills
- Technical Research & Continuous Learning

## HOBBIES

- Outdoor Activities & Travel
- Quality Time with Family and Friends
- Exploring Tech & Coding YouTube Channels

## WHY HIRE ME?

I bring hands-on product development experience in building, maintaining, and scaling real-world web applications. I have proven expertise across complex frontend UIs, robust backend APIs, database architecture, and microservice workflows.

I can contribute effectively from Day 1 and take full end-to-end ownership of projects.

**Core Strength:** Product development, API engineering, database design, scalable application workflows, and end-to-end ownership.
